THE IMPORTANCE OF PLAN BOOKS AND COMPLETE PLANS

The building of a home is one of the most important events in life.

In selecting your home from our books, you see exactly how it will appear after construction—a home designed for beauty as well as economy.

To build a home without a plan or with only hastily drawn sketches is like your tailor making your suit without definite measurements. It can be done, but the process is generally costly and the result is usually unsatisfactory.

A large percentage of home owners have bought, or are buying, their homes on monthly payments; otherwise they would not be able to live in their own homes.

Financing a home today is more simple than it has previously been.

The actual cost of a home purchased on the payment plan is only the cash you pay down, in some instances as low as five to ten per cent of the total value of your property; then the balance is paid in monthly payments, which include insurance, taxes and interest. The monthly payments are often no more than the amount you would have paid in rent for a home equally as good.

METHOD OF SECURING A LOAN

As soon as you have selected your plan, take it to the proper official of your local Building and Loan Association, Bank, or other financial institution. Inform him of the details you wish to carry out and he will assist and instruct you how to proceed. He will also inform you as to how many sets of plans you should have and give you all the other information you will need to secure your loan.

He will furnish you the necessary application blanks and will assist you in filling them out in the proper manner. He will then refer your application to the proper committee for their appraisal and approval; then he will notify you of their findings.

This procedure is practically the same whether you wish to secure a private loan, an F.H.A. loan, or a loan directly from your financial institution.

Your lending institution has had much experience and their advise and counsel will not only be cheerfully given, but will be invaluable to you.

No. 26—This is one of our loveliest designs. A design of beauty where the homey lived-in atmosphere is retained. This house is much less expensive to build than its first appearance indicates. The bed room on the first floor may be used as a library, and the den on the second floor as a sewing room or store room if desired. Also if desired, the garage and maid's room may be omitted.

Cubic Feet:

Basement	11,968

- *Persistence and zeal on the part of the men of Amiens have made possible the famous Amiens Cathedral which stands today; four times it was built and destroyed by fire or lightning. It was erected for the fifth time in the thirteenth century and it has stood since that time: even the last construction was not without mishap, however, for in 1258 fire badly damaged much of the woodwork and made it necessary to rebuild part of the then unfinished interior. Norsemen burned to the ground the first Amiens Cathedral in 881. It was rebuilt but destroyed by lightning in 1019. The next structure was burned in 1107, and the one that replaced it was completely ruined by lightning in 1218. The present cathedral was begun in 1220 and completed late in that century. The chief treasure of Amiens is a part of the skull of John the Baptist. It is kept in the Chapel of St. John the Baptist and shown only at the most important ceremonies. All that remains is the front part of the skull including the face. It was first kept in the churches of Asia, from there was removed to Constantinople and thence to Amiens.*

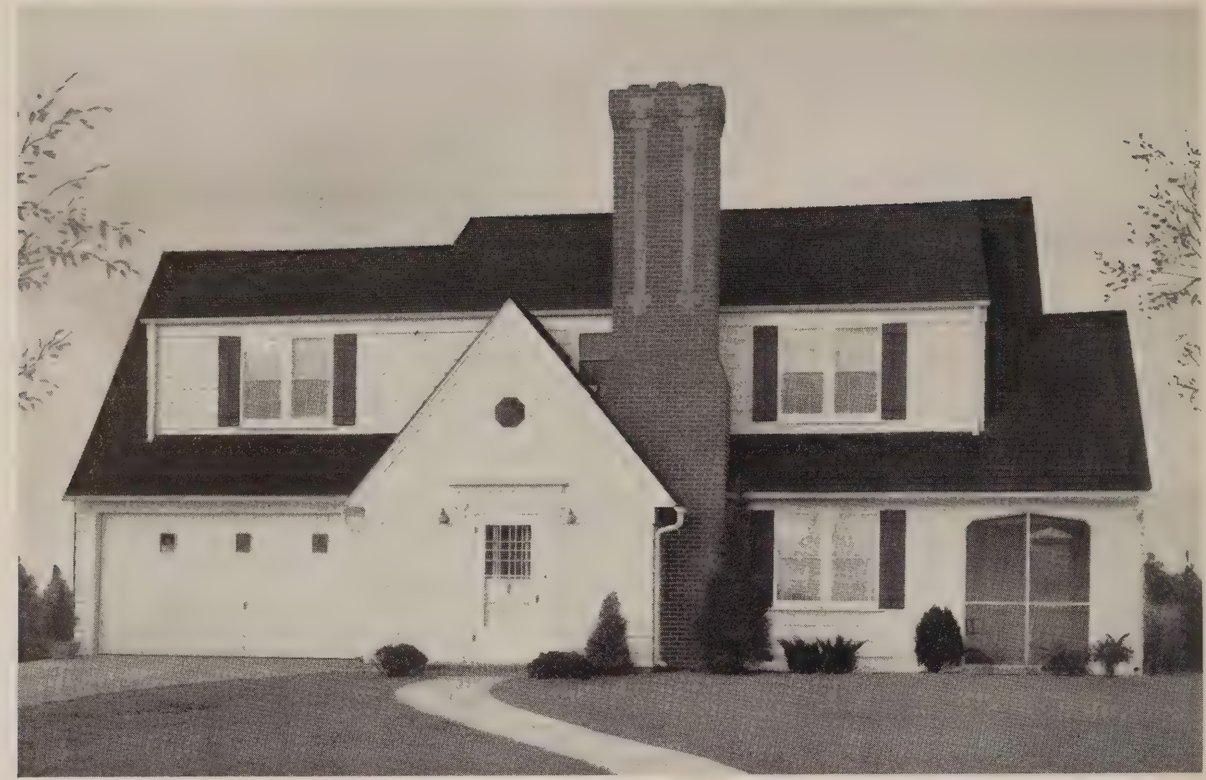
• *Before the Spaniards came to America there were to be found the cliff-dwelling Indians, whose homes were carved out of the face of great cliffs, at a height which often ranged between the height of Washington's monument and Eiffel Tower. Cliff locations were sought as protection from the roving warlike tribes who had no fixed places of habitation.*



No. 54—A very beautiful home and an excellent arrangement where four bedrooms are needed. The construction is frame covered with shingles. The double garage is very conveniently located. A large recreation room with fire place is provided for in the basement.

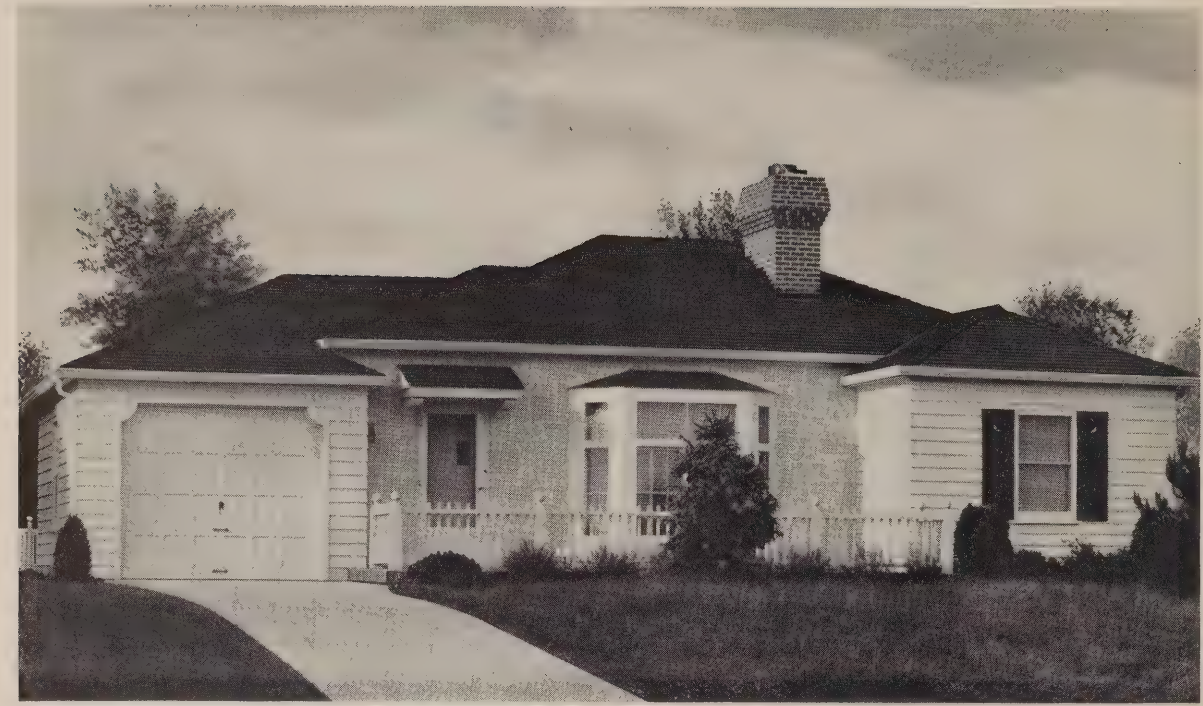
• *The first building erected by the Government in Washington, D. C., was the White House, modeled after the palace of the Duke of Aleinster in Ireland, designed by James Hoban. The corner stone was laid by George Washington on October 13th 1792 and the building was first occupied by President John Adams. It was burned by the British in 1814, only the four walls left standing. It was restored in 1818 and to obliterate the marks of fire the stones were painted white. That is how it came to be known as the White House.*



No. 75—The beauty of this cottage is increased by the long low roof lines and the little fence around the terrace. The stone veneer and bay window also add to the attractiveness of the exterior. An excellent plan arrangement is shown with the garage conveniently attached. A full basement with a recreation room is provided.

Cubic Feet:

Basement	8,768
First Floor	9,316
Garage	1,920

Complete plans as shown or reversed, specifications, lumber and mill list	$15.00
Duplicate sets with original order. Per set	5.00

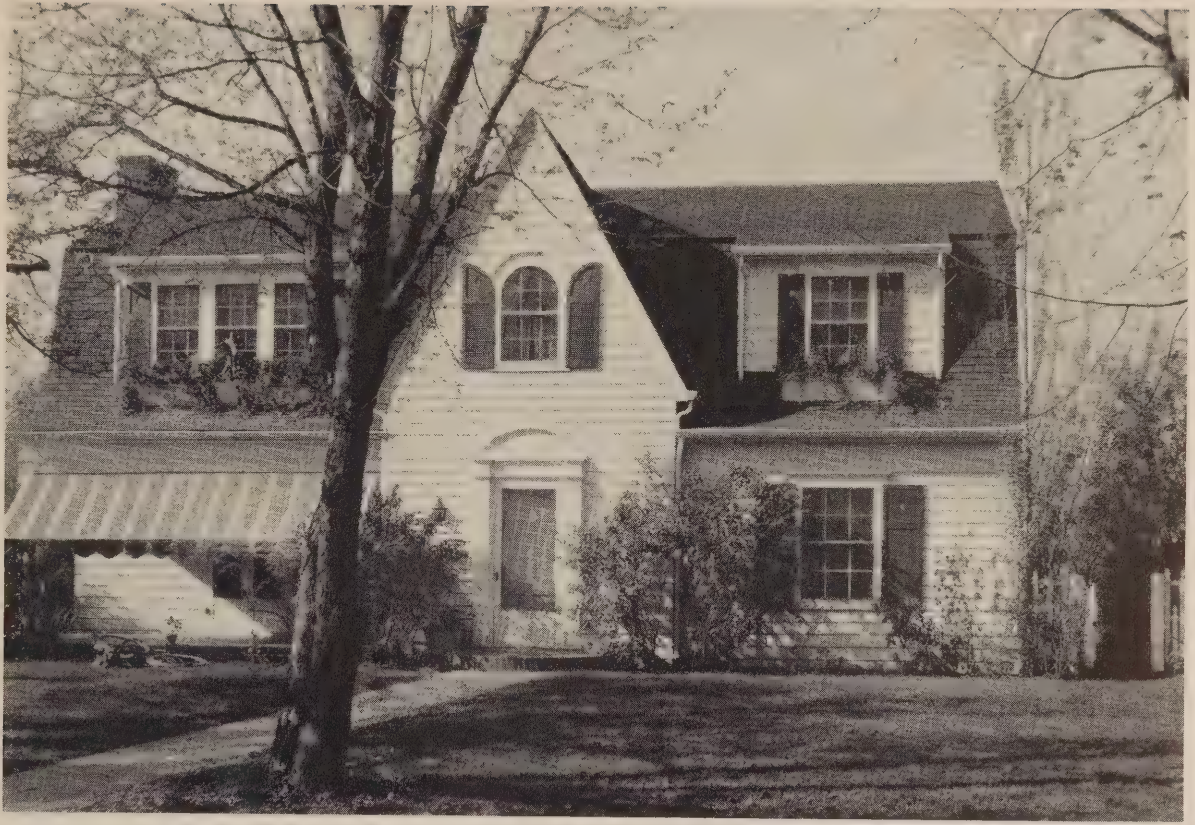
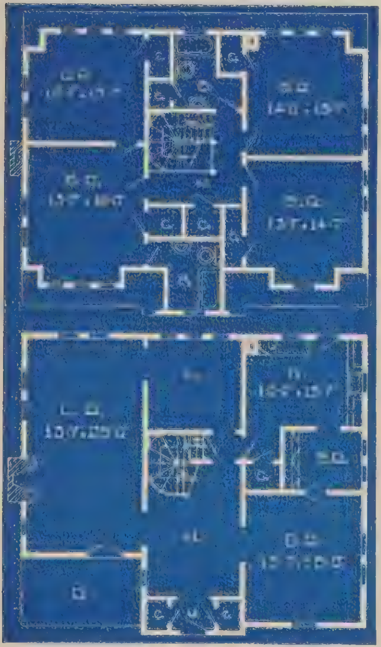
• *Flag of the United States. A Congressional resolution passed July 14, 1777, declared "That the flag of the thirteen United States be thirteen stripes, alternate red and white. That the Union be thirteen stars, white in a blue field, representing the blue constellation." In 1794, Congress decreed that after May 1, 1795, the flag of the United States be fifteen stripes, alternate red and white, and that the Union be fifteen stars. The stars and stripes were to be equal and a star and stripe were to be added at the admission of each new State. It was soon realized that this addition would soon render the flag too large and a resolution was passed April 4th, 1818, reducing the number of stripes to thirteen, representing the original Union, and making one star for each State admitted.*





No. 77—Size 40 feet by 34 feet—A beautiful design to delight the heart of the home lover. On the first floor are four beautiful rooms, breakfast room and closets. A beautiful staircase circles up from the front hall and leads to four excellent bed rooms, two baths and closets.

Cubic Feet:

Basement . .	8,047	First Floor . .	9,683

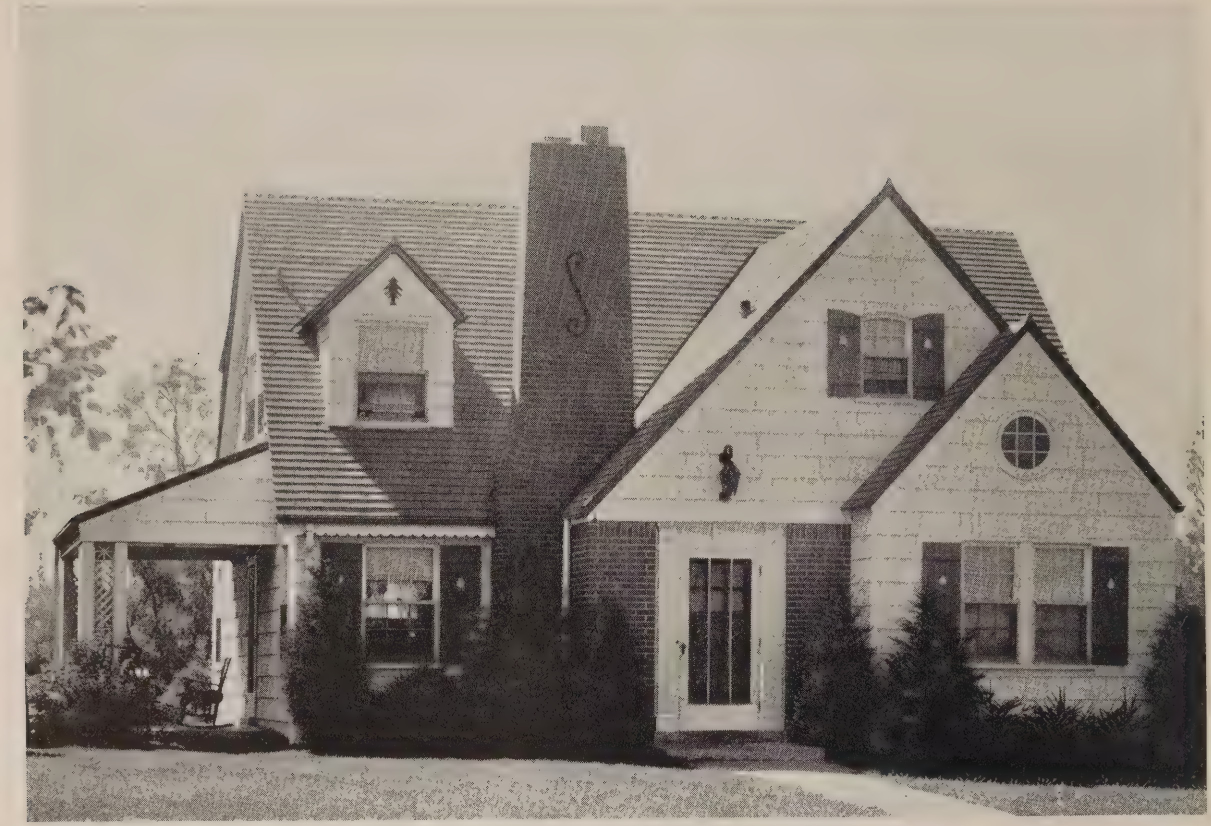
• *Liberty Bell. This famous bell hangs in Independence, Hall, Philadelphia, Pa. It was cast in England in 1752 and bore the inscription "Proclaim liberty through the land and unto all the inhabitants thereof". Owing to a flaw, it was recast in America with the same inscription. In 1776, it announced to the multitudes assembled the glad tidings of Liberty on the occasion of the adoption of the Declaration of Independence.*



No. 79—This lovely shingle design is equally as good for a country home as for the city. The plan is quite compact and shows four excellent rooms, bath, closets, and breakfast nook on the first floor and two fine bed rooms, bath and closets on the second floor.

• *Passion Play. A dramatic presentation of the chief events in the Passion of Christ, performed every tenth year by the inhabitants of the village of Oberammergau, Bavaria, in accordance with a vow made by them in 1633 to express their gratitude of the cessation of the plague. The play depicts the events recorded in the Gospels and is interspersed with tableaux from the Old Testament. It occupies about 7½ hours to present it and it lists the services of about 500 people.*

• The home of Andrew Jackson near Nashville, Tennessee, was known as the Hermitage. In 1805 it was little more than a block house but in 1819 Jackson rebuilt it. The simplicity astonished Lafayette when he visited Jackson in 1825. In that year visitors were met at Nashville by the General's carriage drawn by four horses and driven by a negro servant. After a drive of eleven miles, the carriage entered the iron gate, rolled through a lane of trees, up to the two-story building with its white wooden veranda supported by heavy pillars. After passing through the hall, the visitor stepped on to another veranda, looking upon a pleasant garden of flower beds and gravel paths.

• *The Palace of Chapultepec stands on the hill of Chapultepec, a 150-foot bluff, three miles from Mexico City. About the base of the hill is a grove of huge moss-draped cypress trees, dating back to before the Spanish conquest. The palace surrounded by splendid flower gardens, is an immense building with spacious halls and handsomely decorated galleries. Marble-paved terraces command one of the finest views in the world—the magnificent valley of Mexico—with its cities and lakes in the foreground, and in the background, snow-capped volcanoes.*

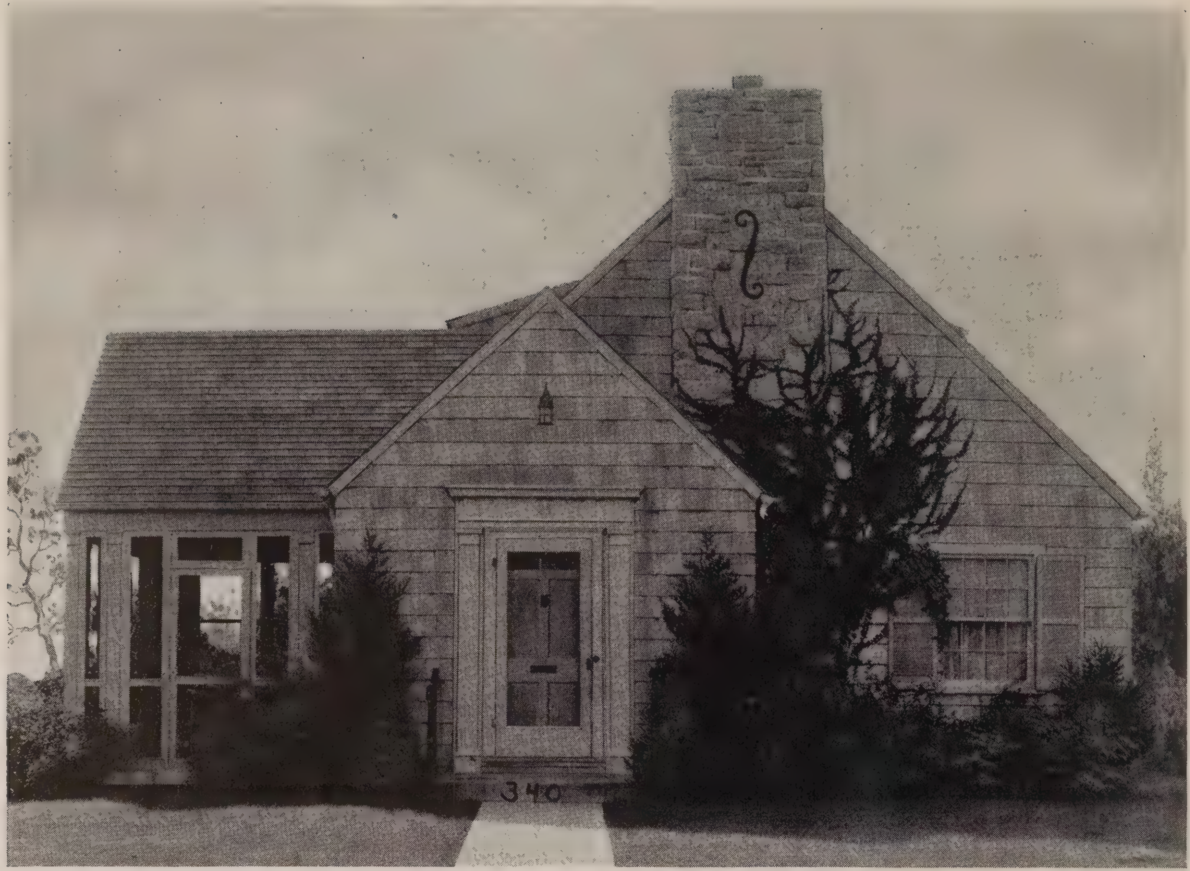
• *Pharos of Alexandria. A famous light house on the Island of Pharos at the mouth of the harbor of Alexandria. Commenced in 298 B.C. and completed about 283 B.C. Consists of white marble columns 550 feet high, on the top of which fires were kept constantly burning. The cost of this structure was 800 talents (about $900,000.00). It is one of the wonders of the world.*



No. 340—The roof lines and chimney silhouetted against the sky, the house snugly nestling on the lawn and its outlines softly diffused by the shrubbery, form a picture called "Home." This beautiful cottage contains a large sleeping room and a two-piece bath on the second floor.

• *There is an old legend about the founding of Westminster Abbey that places it as early as the beginning of the seventh century, but the first authentic church at Westminster was built by Edward the Confessor and consecrated in 1065. Henry III pulled down most of this church and began the building of the present Abbey, which was completed by Henry VII, though the western towers were not finished until 1740, so that the building of this beautiful edifice really occupied five centuries. It is one of the very finest examples of early English and Gothic architecture. Its interior is a hallowed spot—on every hand the monuments of princes, statesmen, soldiers and the great and illustrious men of England.*

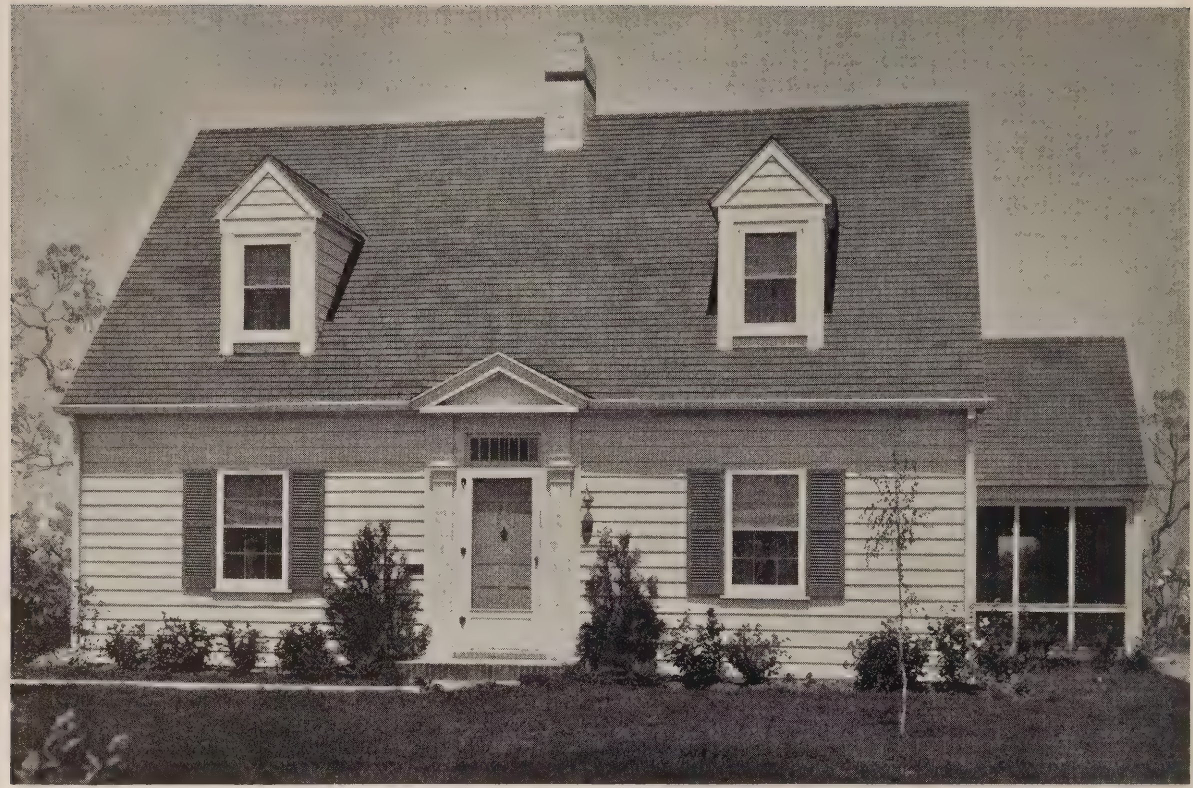
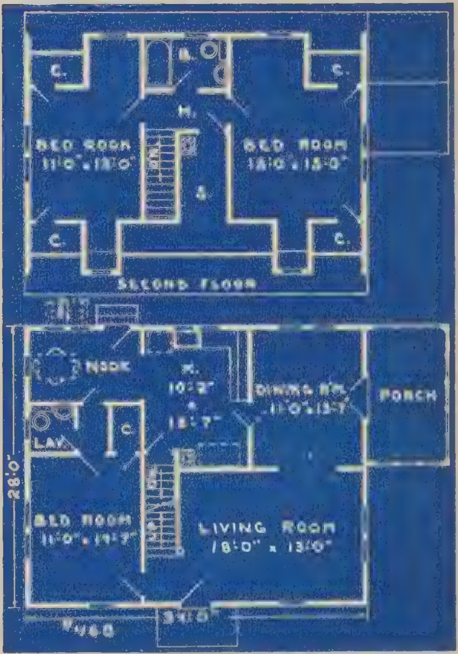
- *Pyramids. To build the great pyramid Cheops there were cut from the hills across the river some 40 miles away 2,300,000 blocks of stone, each weighing 2½ tons, and nine stone beams that weigh from 60 to 70 tons each. How these were moved from the quarry across the river and put in place is still a mystery.*





No. 468—This lovely Cape Cod cottage is quite commodious and practical to build. There are six very fine rooms, breakfast room, bath, lavatory, closets and large storage space, all conveniently arranged.

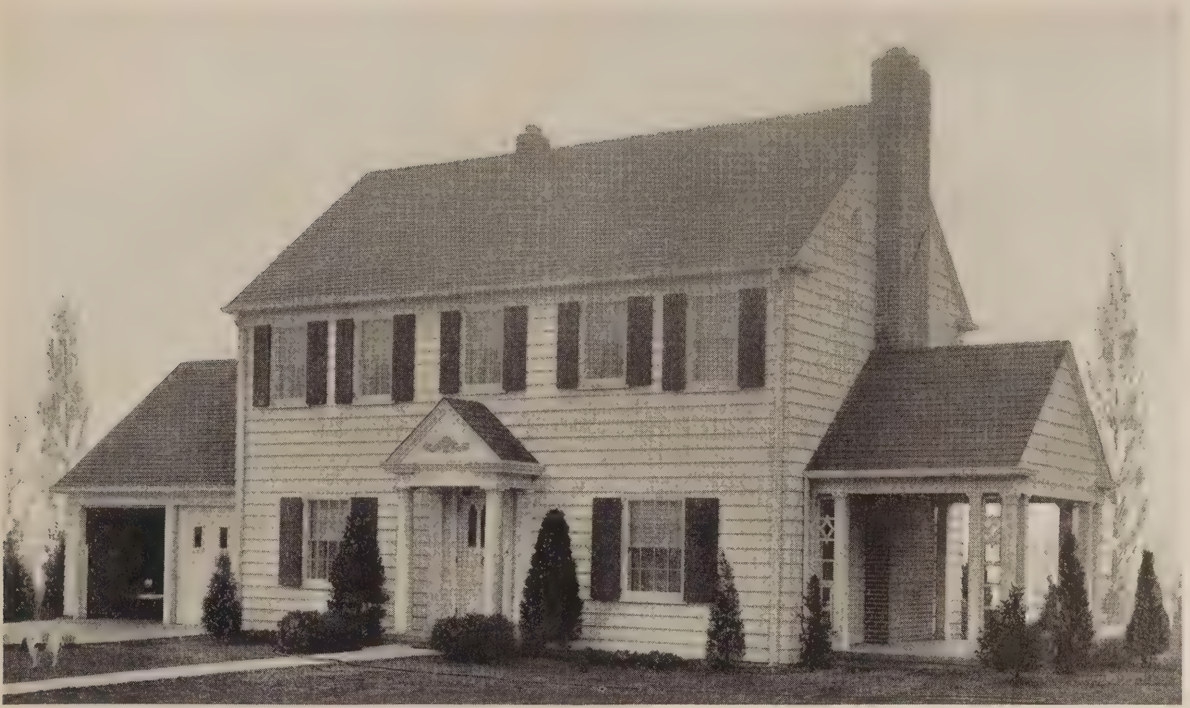
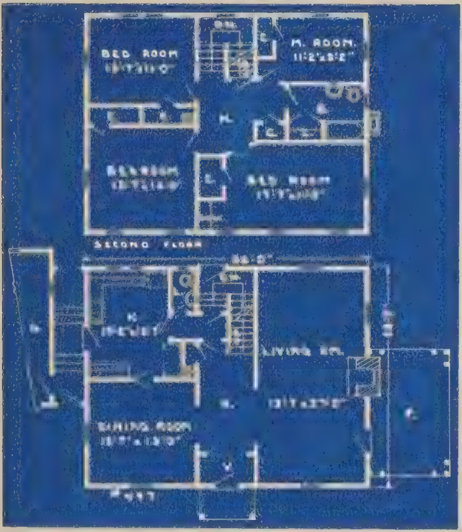
• *The chief characteristics of the Colosseum are strength and solidity. It is the Amphitheater where the Romans held gladiatorial fights, though they later added to the program the slaughter of Christians by wild beasts, affording great amusement for the crowds. The building is oval in shape and had four tiers of seats surrounding the arena, which is about 280 feet long by 160 feet wide. When it was dedicated in 80 A. D. by Emperor Titus, there was a celebration that lasted almost one hundred days. Five thousand wild animals were slaughtered in the arena. It was not until the reign of Justinian in the sixth century that the shedding of human blood ended. A bull fight was held in the building as late as 1332. About 1750, Pope Benedict consecrated the building to the memory of Christian martyrs who had died there to make a holiday for mighty emperors and blood thirsty mobs.*





No. 497—A two-story Colonial design of excellent proportions with a two-car garage attached at one end. If not desired, the garage may be omitted. Seven splendid rooms, complete bath, lavatory and closets make up the floor plan.

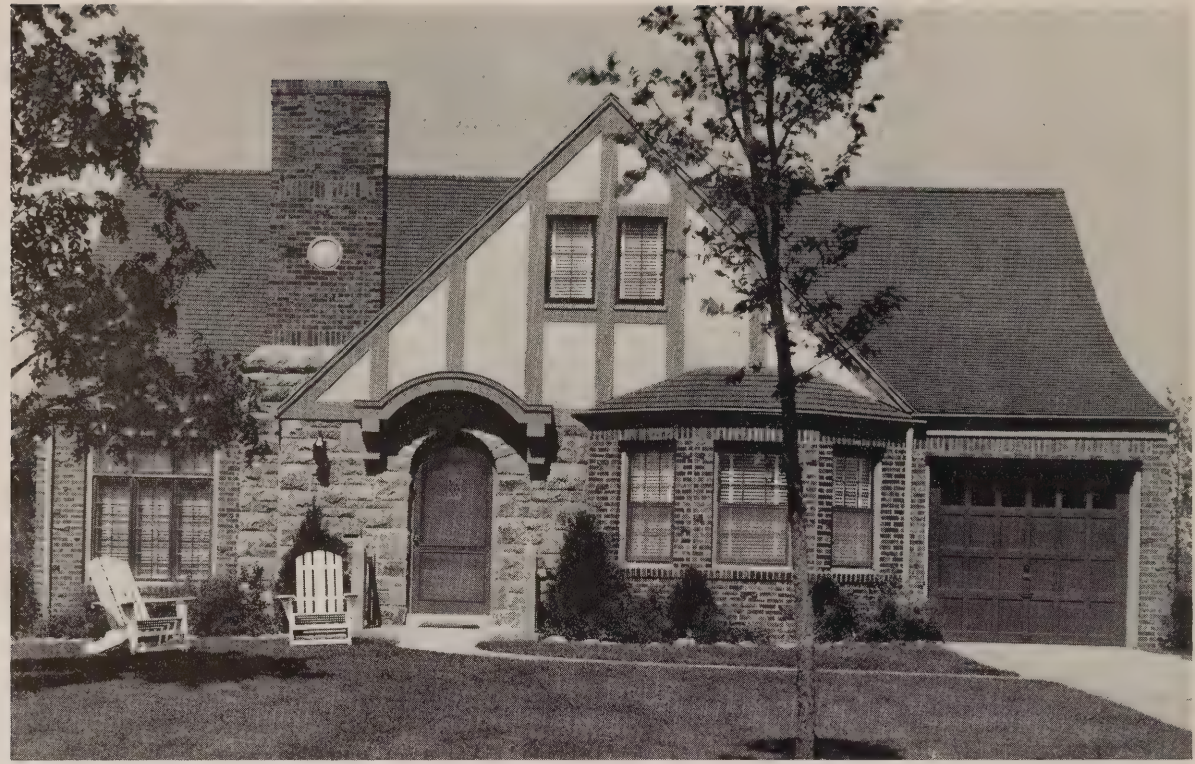
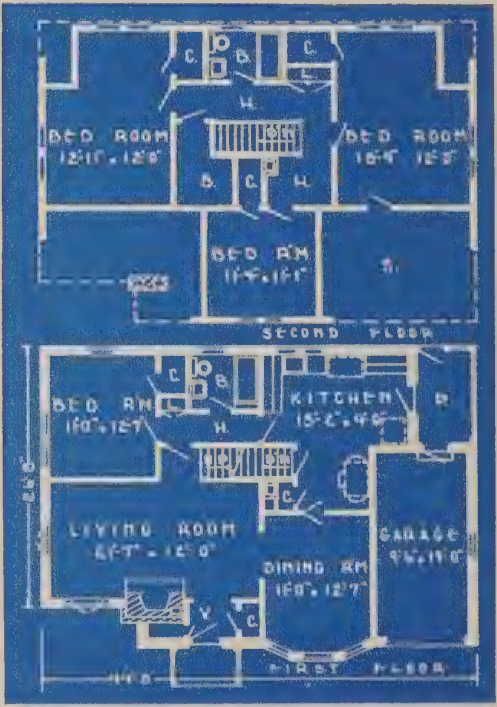
• Monticello was the home of Thomas Jefferson near Charlottesville, Virginia. He inherited the 1900 acre estate from his father. In 1765, he began building the house on a hilltop but it was not entirely completed until about twenty years later on account of his devout attention to his Country. After his retirement from office he lived for seventeen years at Monticello, which became the resort of all the great minds of the Country. This keeping open house ruined Jefferson financially. It was even necessary for him to sell his vast library, but when his friends heard of his difficulty, they raised $18,000.00 to assist him. He only lived a short time after that to enjoy this kind generosity. Monticello is one of the most elaborate Colonial houses in the South. The exterior is a temple-like structure, a story and a half high. The main house is about 35 feet wide by 70 feet deep, and on each side of this are wide wings, making a total width of 100 feet. A very interesting feature of the house is that the beds are built in. Each bed room has an alcove, across which slats are laid and the beds are placed on the slats.





No. 566—This beautiful house is constructed of frame, with brick and stone veneer for the first story. The floor plans show an excellent arrangement of seven rooms, two complete baths, many closets and an attached garage. A full basement with a large recreation room is under the house.

● *"The Little Church Around the Corner." A name popularly given to the Episcopal Church of the Transfiguration in New York City. Rev. W. T. Sabine refused to read the funeral services over the body of George Holland, the actor, and referred the friends of the deceased to "A Little Church Around the Corner, where they did that sort of thing." Dr. Houghton, the rector of the Church, readily consented to officiate and thereby endeared himself to the members of the dramatic profession. Since that time, most of the famous actors that have died in or near New York City have been buried from the "Little Church Around the Corner."*

• *The first buildings of shelter were probably built in Egypt by fixing reeds, stocks, palm ribs, and other such materials, in the ground in a circle, binding their tops together and tying them fast. These, covered with the smaller branches, palms and grass-like materials, appeared like domes. Mere holes in the side of the buildings formed the doors. This primitive form of building is scarcely changed by the many centuries and buildings, as rude as these poor beginnings still serve in some localities.*

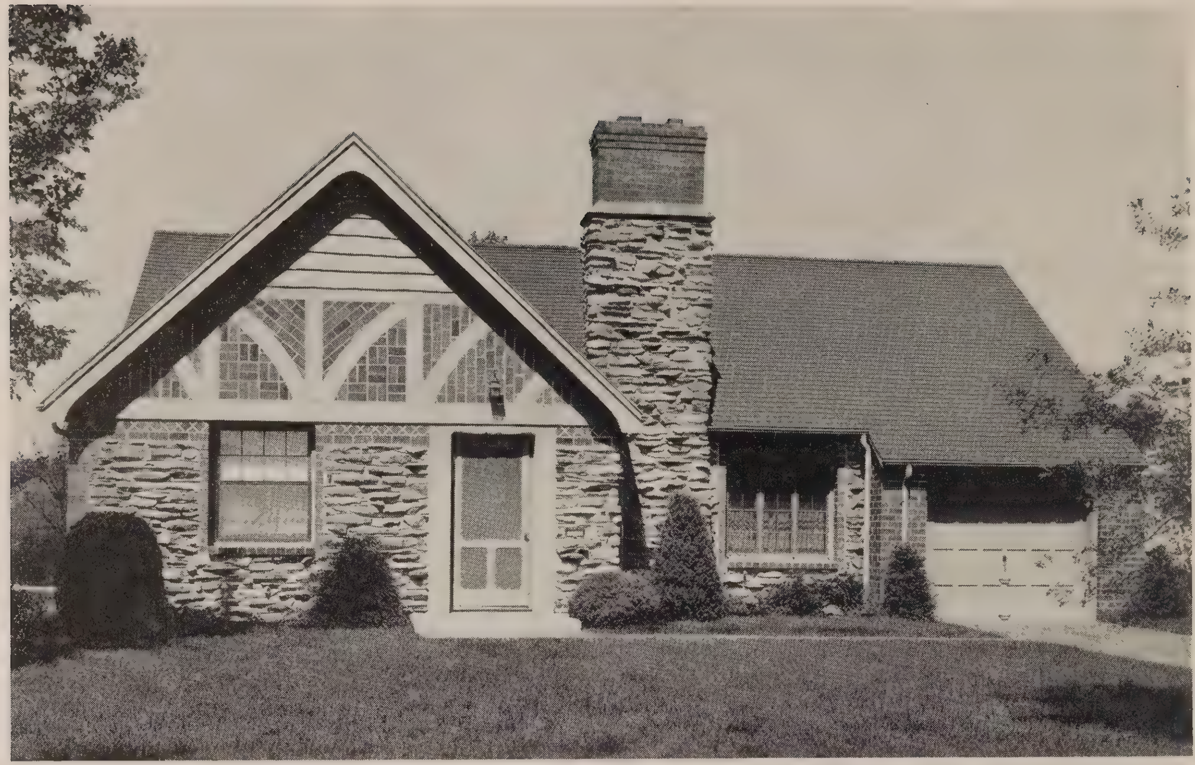
- *The Taj Mahal, which, translated, means "Gem of Buildings," was erected between 1632 and 1654 at Agra, India, by the great Mogul of Delhi, Shah Jahan, as a tomb for his favorite wife, Mumtaz Mahal. A product of Mohammedan art, it was built of pure white marble, inlaid with jasper, agate and other precious stones. The construction of Taj Mahal required the work of 20,000 men for 22 years. Its spacious setting commands much of the beauty which has attracted millions of visitors from all parts of the world. At each corner of the marble terrace on which the tomb rests is a beautiful marble tower. When the magnificent tomb was completed, the great Shah Jahan ordered the architect who designed it to be thrown over the cliff into the Jumna River, because he feared some other emperor might hire the architect to design another building as beautiful as Taj Mahal.*



No. 950—This beautiful cottage with its unusual gable is of frame construction with brick veneer exterior, except where stone veneer is shown in front. A very excellent arrangement of five large rooms, bath, closets, and garage is shown. The kitchen spaces and equipment are especially convenient. In the basement is a large recreation room.

• *Heidelberg Castle in Heidelberg, Germany. Its architecture is varied, being the work of many ages and many men. It was partly destroyed in 1689 and again ruined in 1693 by the French. There were several attempts to rebuild it but nature and the French were against it. It was struck by lightning in 1764, which reduced it to its present condition. Now these old walls stand covered with ivy.*

• *Arlington, Home of Robert E. Lee. The house was built by George Washington Park Custis, Washington's stepgrandson, in 1802, 200 feet above the Potomac. As a boy, Robert E. Lee had frequently visited Arlington. In 1831, he married Mr. Custis' only daughter. Aside from its historic interests, Arlington has always been distinguished for its classic beauty. Before the Civil War, it was considered the finest place of architecture of all mansions in the south. Arlington appeals to us mostly as the home of the distinguished family of Lee.*

• *Tower of Babel. According to the account given in Genesis 11, the descendants of Noah journeyed eastward after the flood to the Plain of Shinar and there attempted to build a tower, whose top should reach the heavens. Jehovah, in his anger, confused the language of the builders and scattered them over the face of the earth. On this account the tower was called Babel or confusion. The structure was of burned bricks and slime. The site of the tower has always been a matter of dispute. It is generally identified with the great pile of ruins in the suburb of Babylon, about eight miles distant. Its ruins still attain an elevation of 153 feet above the plain. According to other authorities, the tower was built about seven miles from Babylon.*

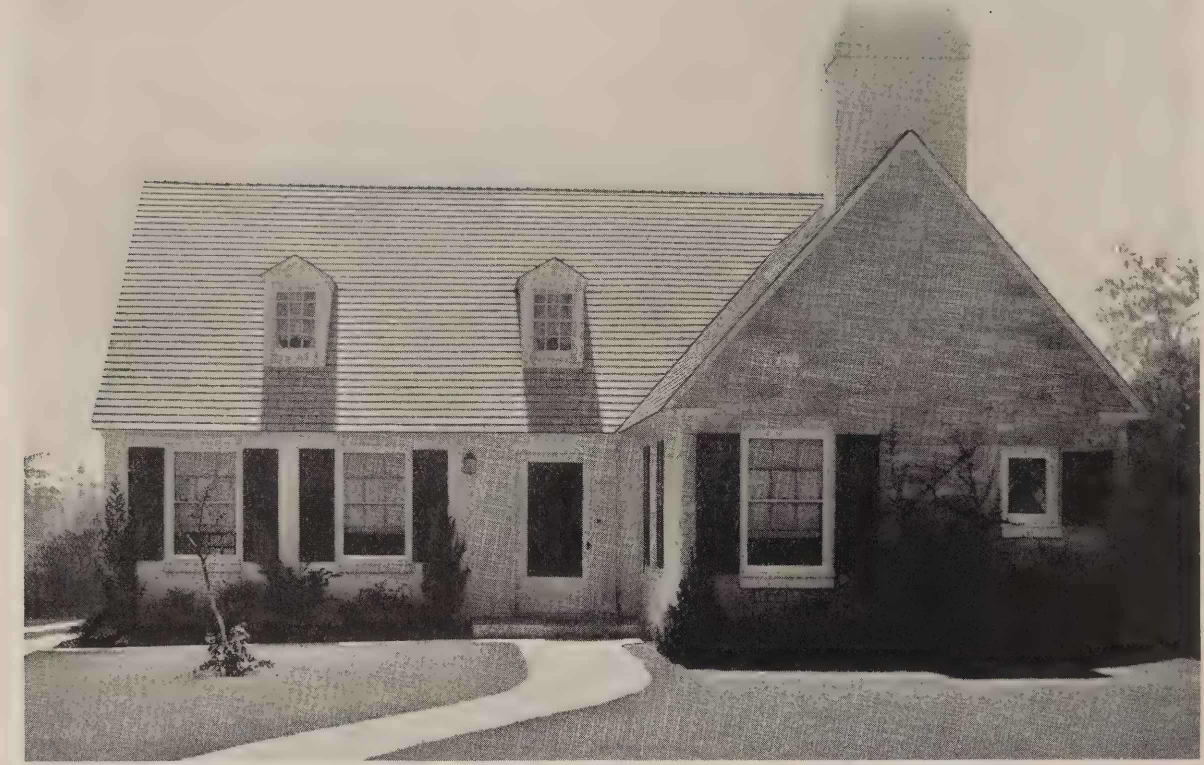
• *Leaning Tower of Pisa in Italy, marked for its deviations from the perpendicular. This inclination is said by competent judges to have resulted from a defective foundation. The tower was commenced in 1174 but was not completed until the middle of the 14th century. It is built of white marble, 188 feet in height and 50 feet in circumference. It is cylindrical in shape, consists of eight stories, each of which is adorned with columns. Many claim it to be the noblest tower of Southern Romanesque.*



No. 1472—This is one of the most beautiful designs we are featuring. The exterior is of native stone and painted brick, which makes a surprisingly beautiful combination. The floor plan shows four very fine large rooms, bath and closets on the first floor, and two lovely bed rooms, bath and closets on the second floor.

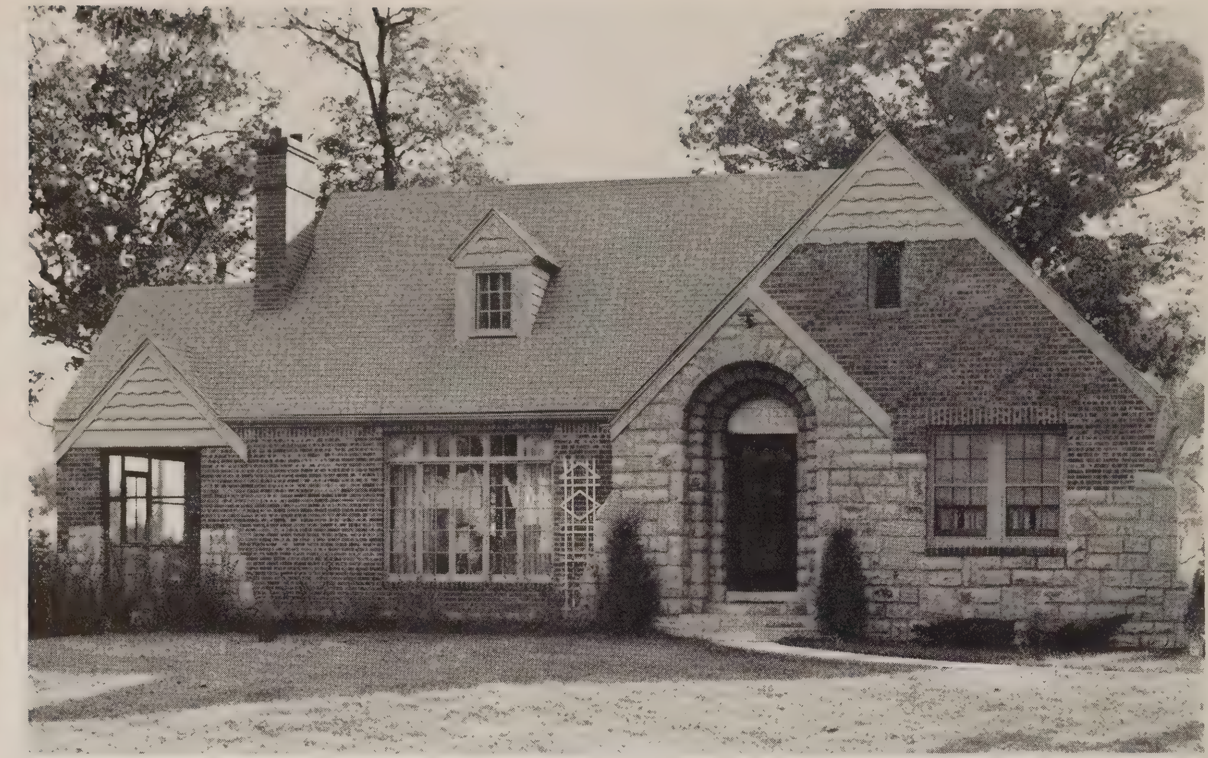
• *Eiffel Tower, Paris, France, is the highest architectural structure in the world, being 984 feet high. It is built of uprights rising on huge piers of concrete, at first curving at an angle of 54 degrees, then growing straighter until they run into a perfectly straight shaft about half way up. On the first enormous platform, containing 5,860 square yards, is a variety theatre, restaurant and cafe. The second and third stories also contain restaurants and cafes. A stairway of 1,798 steps, as well as elevators, lead to the top.*



No. 1483—A lovely little cottage of frame construction with brick veneer exterior. The stone trim adds much to the beauty of the design. An excellent plan of five rooms, bath and closets is shown. The kitchen with its breakfast nook is ideal. A recreation room is located in the basement and the stairs from the dining room lead to a large attic.

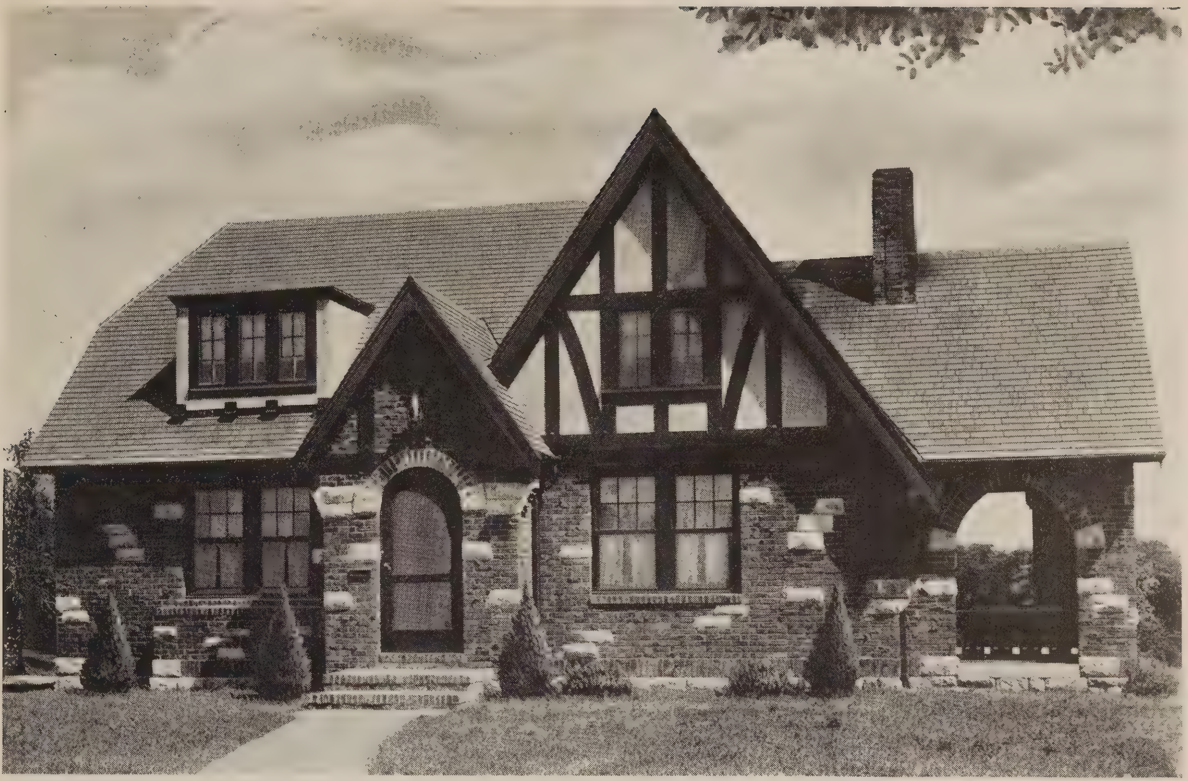
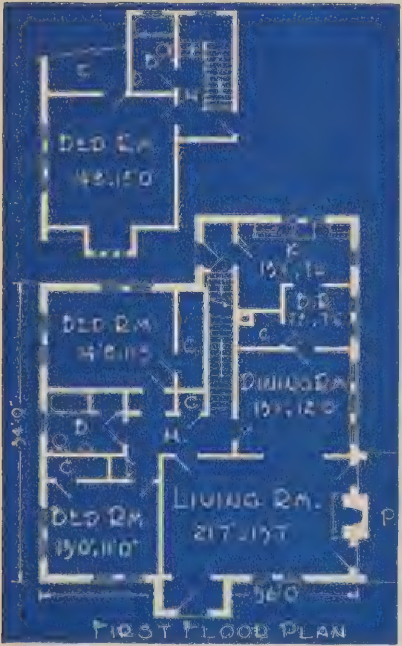
● "Job's Turkey." This simile, suggestive of extreme poverty, refers to the deplorable state to which Job was reduced when delivered by God into the hands of Satan. According to popular notion, Job's Turkey had but one feather in his tail and was obliged to lean against the fence to gobble; but the fact still remains, that Job possessed no turkey and the bird is a native of America.





FIRST FLOOR PLAN

No. 1719—A beautiful and substantial design with brick and stucco exterior and with half timbered gable. • *The Cathedral of Chartres, called Notre Dame, is one of the finest Gothic churches in France. It was founded in the 11th century but was destroyed by fire almost before it was completed. The main part was rebuilt in 1240 and since then a number of additions and changes have been made. The southern tower is 351 feet high and dates from the 12th century. The other tower, Clocher Neuf, completed in the 16th century is 377 feet high. The Cathedral is 440 feet long.*

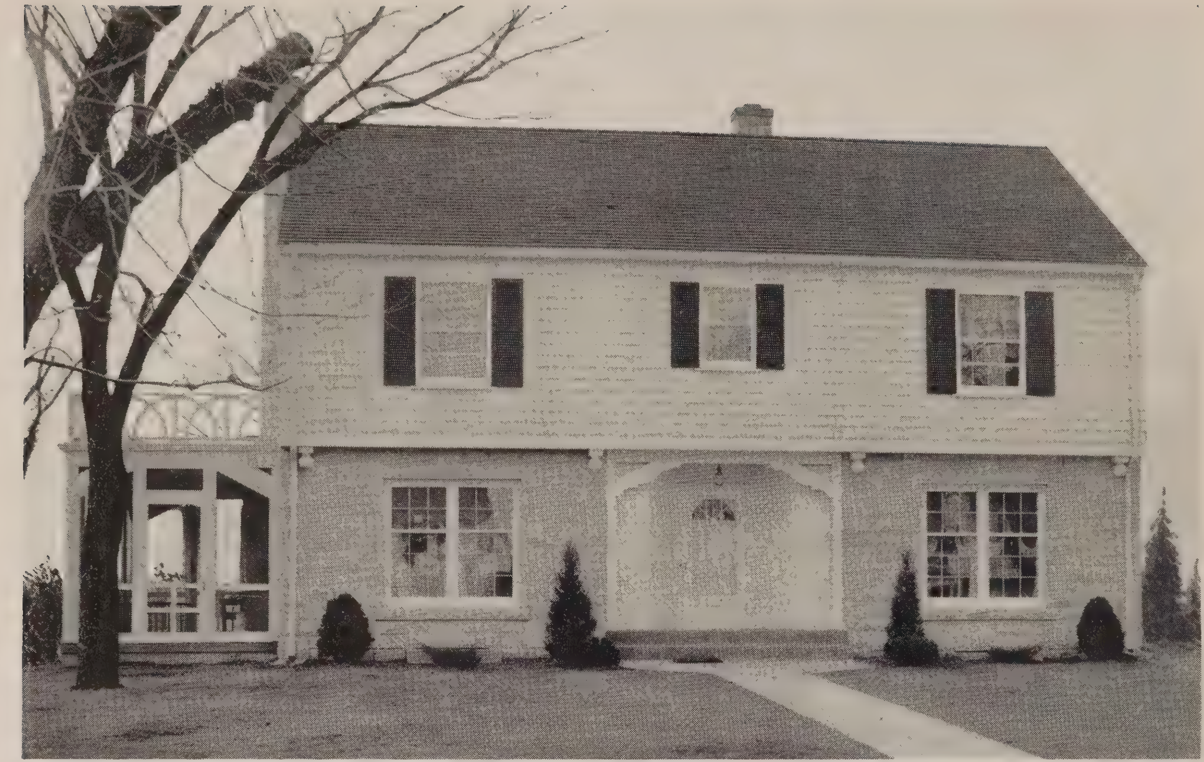
- *"He approaches nearest to the gods; who knows how to be silent even though he knows he is the right."—Cato.*



No. 1853—A charming homey atmosphere is found about this lovely Colonial home. The construction is frame with stone veneer on the first story and siding above. An excellent room arrangement shows four rooms, hall and closets on the first floor and three large bed rooms, two baths and closets on the second floor. The small room on the first floor may be used as a breakfast room, study or play room. A large recreation room is located in the basement.

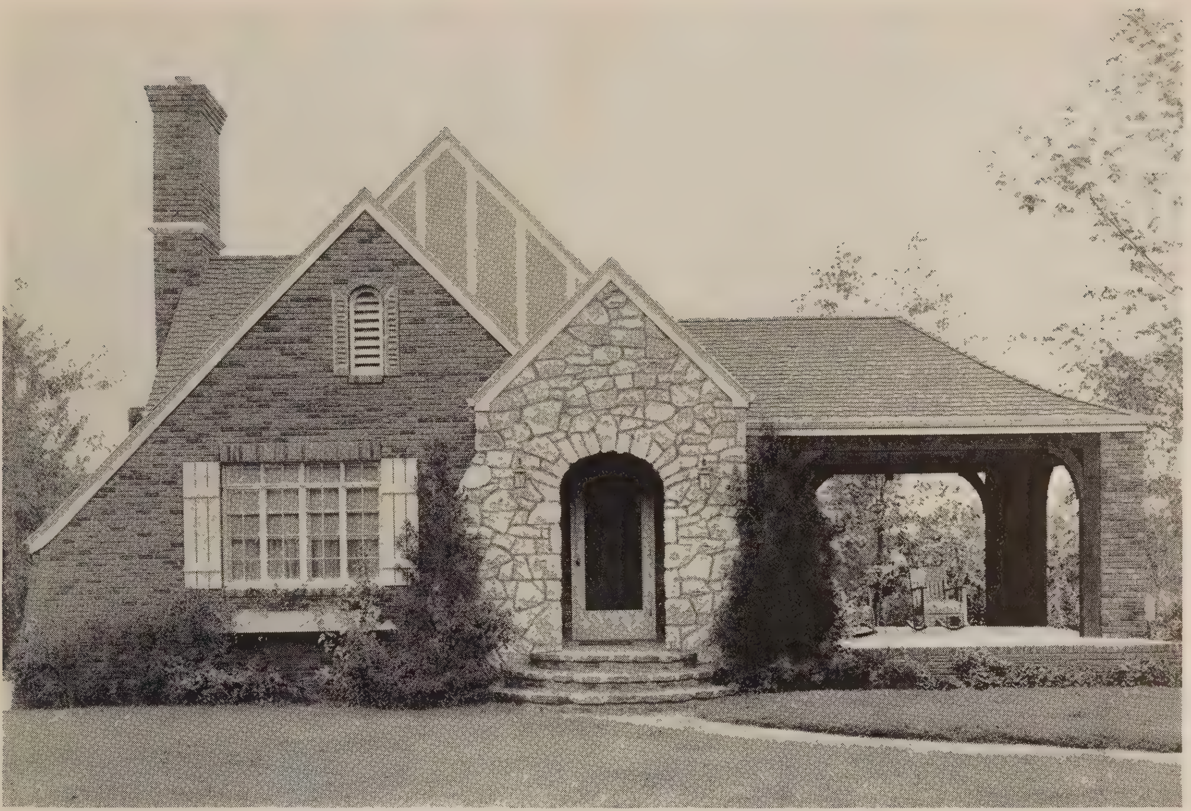
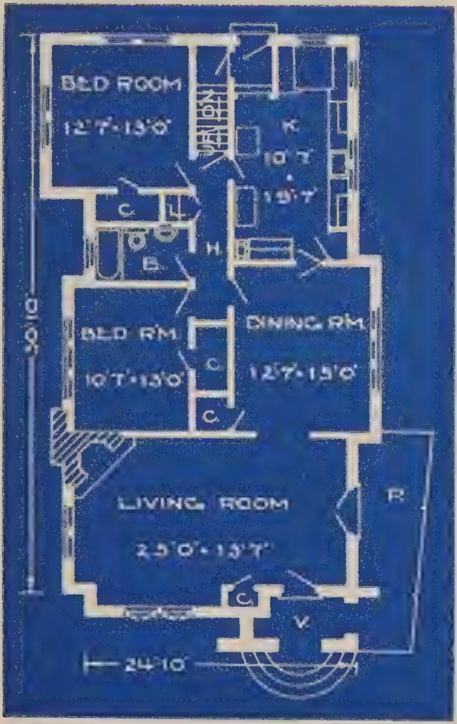
● *Louisiana. The name formerly given to the vast region comprising the territory now occupied by Louisiana, Arkansas, Missouri, Iowa, Minnesota, North and South Dakota, Nebraska, Kansas, Oklahoma, Colorado, Wyoming, Montana, Idaho, Oregon and Washington. It was ceded to Spain in 1762 but was retroceded to France in 1800. In 1803, it was sold to the United States by Napoleon Bonaparte for Fifteen Million Dollars. Disposal by the French Government was to prevent it from falling into the hands of the English.*





No. 1929—This is one of the most beautiful cottages we have ever shown. The combination of brick, stone and stucco is superbly carried out in this design. The floor plan shows five splendid rooms, breakfast nook, bath and closets. The stairs from the hall lead to a large attic.

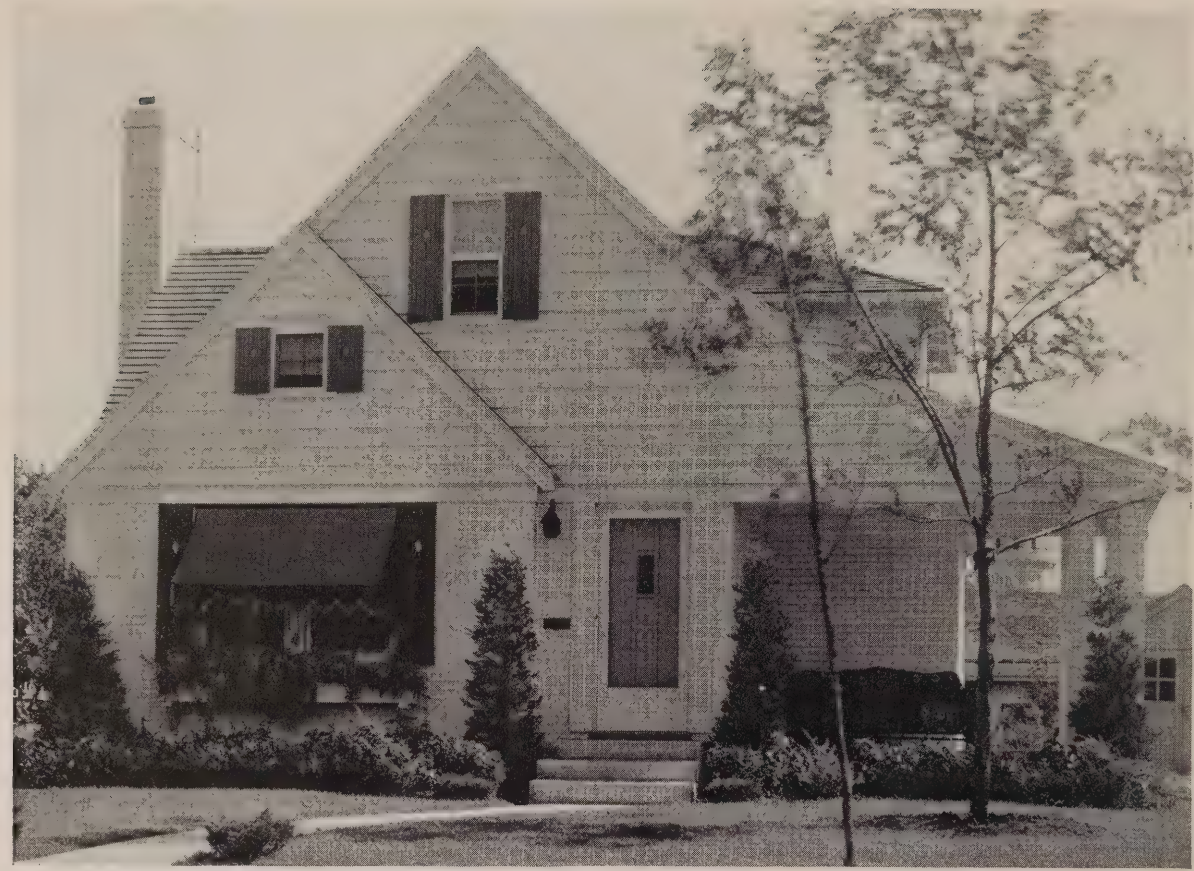
• *Solomon's Temple. A famous Temple at Jerusalem built by Solomon, 1010 B.C., situated on the summit of Mt. Moriah. It was 120 feet in length, 60 feet in width and 180 feet in height. The Temple comprised the Holy of Holies, the Sanctuary, and the Porch, which was surrounded by spacious courts. In the Holy of Holies was placed the sacred Ark of the Covenant, a chest in which was deposited the Tables of the Law. The Temple was constructed entirely of white stone. The interior walls were wainscoted with cedar, richly ornamented with gold. This Temple was repeatedly plundered by foreign invaders and finally burned by Nebuchadnezzar's General in 588 B.C.*



No. 1953 — Painted brick and wide siding are shown on the exterior of this beautiful design. On the first floor are a large living room, dining room, kitchen with breakfast nook, bed room, bath and closets, and on the second floor are two fine large bed rooms and a smaller one, a bath, closets and storage space.

• *The Parthenon. A magnificent Temple of the Acropolis at Athens, erected 444-438 B. C., in honor of Minerva, goddess of the City, at a cost of 6,000 talents (about $7,200,000.00). The building was 228 feet in length by 101 feet wide. In 1687 it was used by the Turkish Government as a powder magazine and in that year it was almost totally destroyed by a shell thrown by the Venetians. In its present ruined state the Parthenon is considered the most perfect specimen of Doric architecture.*

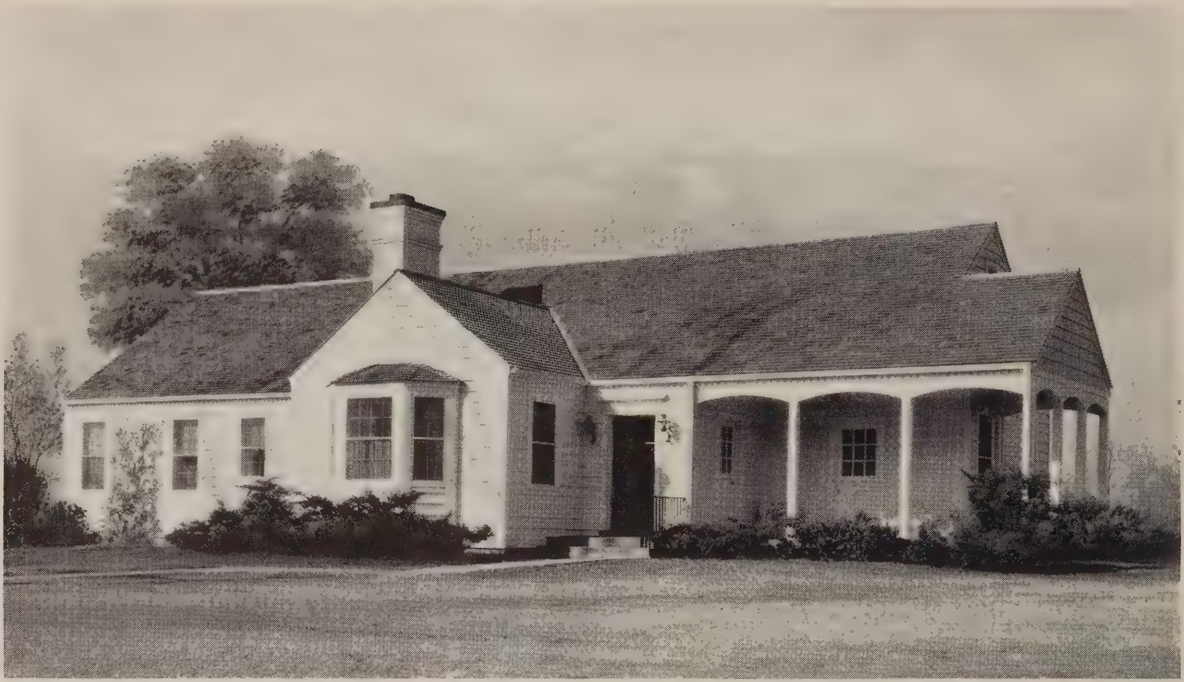
• The Man in the Moon. The name given to the figure observed on the surface of the Moon when looked at with the naked eye. When examined with the telescope, these outlines resolve themselves into shadows cast by the lunar mountains. This figure is supposed to resemble a man leaning on a fork on which is supported a bundle of sticks. For gathering these on Sunday he was imprisoned in the Moon, according to the legend.



No. 1997 — This beautiful cottage has plain, simple lines, making it easy to construct. The house is frame with sided exterior and the plan shows six large lovely rooms, bath, and many closets. The kitchen arrangement is especially fine. The complete plans provide for a large attic and a full basement with a recreation room.

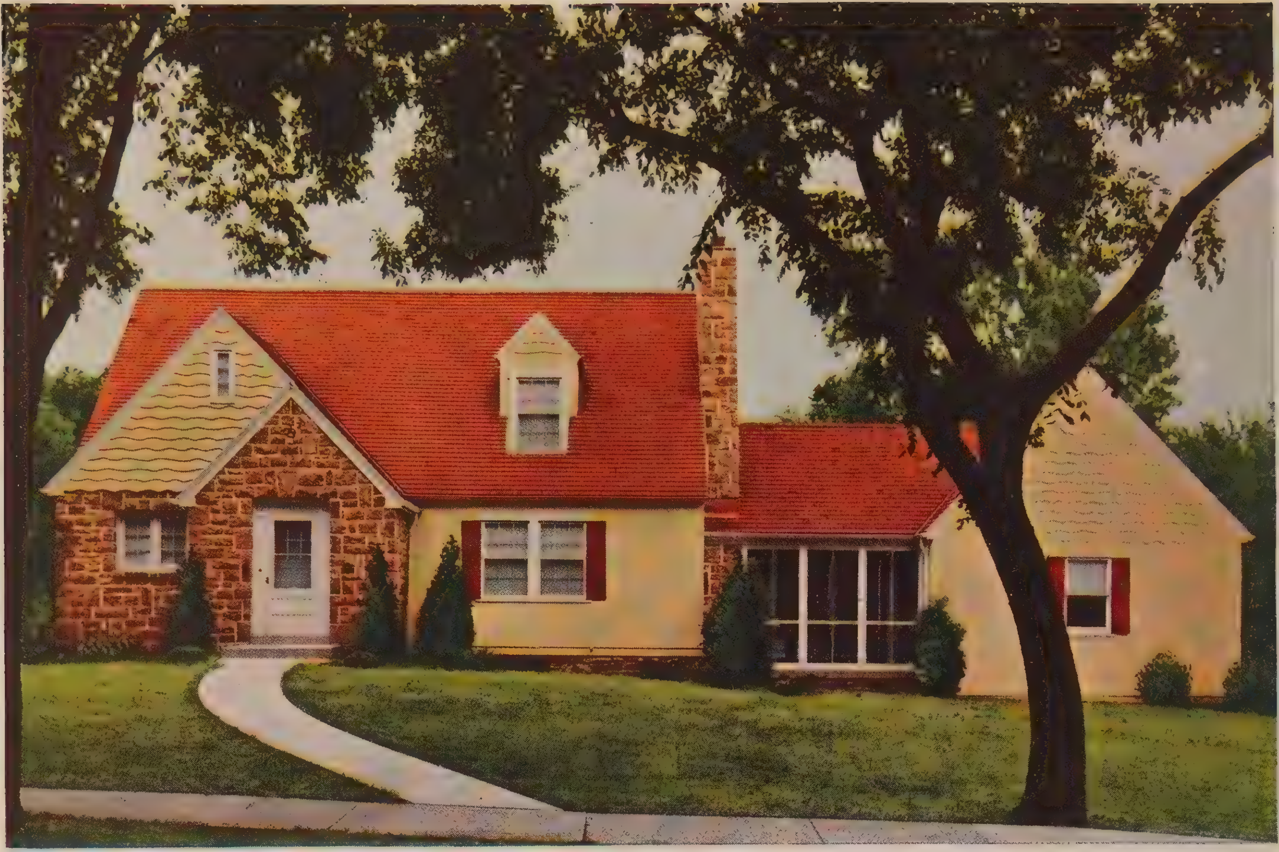
• *The wooden horse of Troy. A gigantic horse which, according to legend, caused the fall and destruction of the City of Troy, devised by Ulysses and Diomed. It was built of wood and filled with armed men. Sion, a cunning Greek, informed the Trojans the wooden horse had been constructed as an atonement of the Palladium which had been carried off by the Greeks and if they would drag it into their own City, Asis would gain the supremacy over Greece. The Trojans believed the story and introduced the monster inside the walls; whereupon Sion, at night, released the soldiers who immediately slew the sentinels, sacked and burned the City, and the inhabitants put to the sword.*



No. 2261—This very attractive design with stucco and native stone exterior shows the garage separated from the house by a large screened porch. The exterior may be entirely of stone, or brick may be used where the stucco is shown. The floor plans show four excellent rooms and bath on the first floor and two large bed rooms, bath and closets on the second floor.

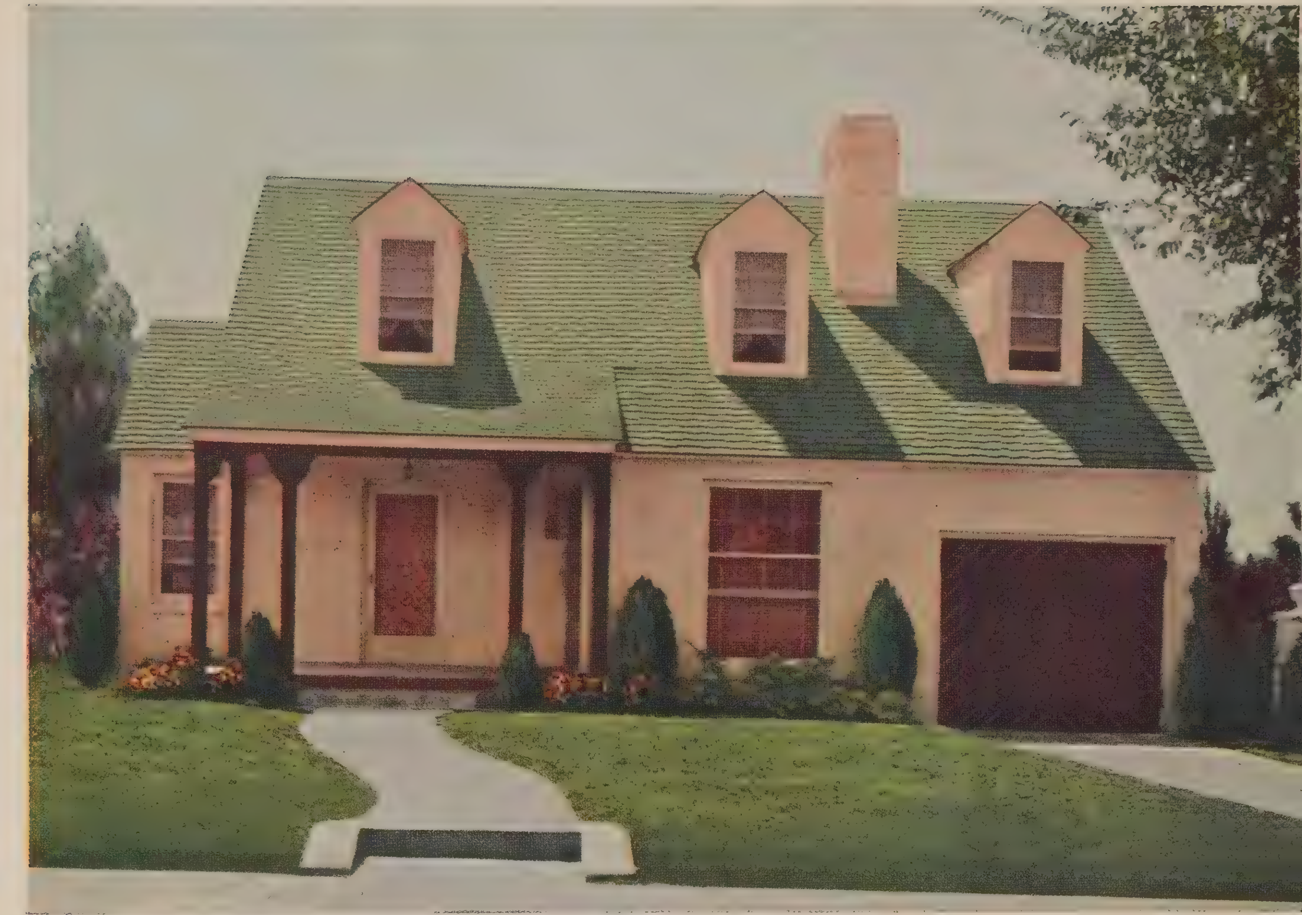
• *Towers of Silence. Name given to the peculiar structures used by the Pharisees for the disposal of their dead. They consist of towers called Dakhmas, open at the top and covered with iron gratings upon which they placed the bodies of the dead. There the corpse remain exposed to the birds of prey and the action of the elements until the flesh has entirely disappeared and the bones have fallen into a pit beneath; whence they are removed to a neighboring cavern. The most noted of these Towers are situated in the vicinity of Bombay, India.*



No. 2280—The exterior of this beautiful home is of painted brick veneer. The very large odd-shaped living room is quite charming. The floor plans show an excellent arrangement of four rooms and garage on the first floor, and two large bed rooms, bath, closets and balconies on the second floor.

• *Westminster Abbey. A noted Church in London, England, built between 1216 and 1272. It is 513 feet in length and 200 feet in width, contains twelve chapels and is the burying place of fourteen kings of England, five queens in their own right, as well as many queens-consort. Nearly all of the kings and queens of England since the reign of Edward I, in 1272, have been crowned there.*
